

ABSTRACT

A cordless digital audio headphone is disclosed. The headphone includes a pair of earphones connected to a headband. The earphones provide audible signals. The headphone also includes a memory slot positioned on the headband for receiving a memory card containing digitally stored audio information. A processor is disposed on the headband, and is coupled to the memory slot for retrieving the digitally stored audio information from the memory card. An analog to digital converter receives the digitally stored audio information, and provides the audible signal to the earphones.
